Token Ring: Principles, Perspective and Strategies (Data communications and networks series) [Hans-Georg Gohring, Franz-Joachim Kauffels] on zikovic.com

The principle used in the token ring network is that a token is circulating in the ring and whichever node grabs that token will have right to transmit the data.

Token Ring local area network (LAN) technology is a communications protocol for local area networks. It uses a special three-byte frame called a "token" that.
