AFRICAN AMERICAN STUDIES / AMERICAN HISTORY

Winner of the Corwin Prize from the American Culture Association

"Andrew Wiese has made powerful inroads into challenging the myths of suburban development and the role of black Americans in that history.

*Places of Their Own* is a must-read for anyone interested in a complete history of American cities and suburbs."

—Ellen Shubert, *The Next American City*

As this pioneering work demonstrates, the suburbs have provided a home to black residents in increasing numbers for the past hundred years—in the last two decades alone, the numbers have nearly doubled to just under twelve million. Andrew Wiese begins *Places of Their Own* by painting an austere portrait of the conditions that early black residents found in isolated, poor suburbs over a hundred years ago. He then examines this phenomenon throughout the twentieth century, including, for example, differences between black suburbanization in the North and South. Ultimately, Wiese explores how the civil rights movement emboldened black families to purchase homes in the suburbs with increased vigor, and how the passage of civil rights legislation helped pave the way for today's black middle class. Tracing the precise contour of black migration to the suburbs over the course of the whole last century and across the entire United States, *Places of Their Own* will be a foundational book for anyone interested in the African American experience or the role of race and class in the making of America's suburbs.

"A work of exceptionally broad research, *Places of Their Own* does much more than simply document the presence of African Americans in suburbs. It also illustrates how black suburbanization changed over the course of the twentieth century."

—Amanda Seligman, *Journal of Planning History*

"In *Places of Their Own*, Wiese makes an irrefutable case that African Americans have long lived in suburbs. Wiese's impressive analysis of the black struggle to achieve the suburban dream complicates in important ways our understanding of how race and class shaped the metropolitan landscape of twentieth-century America."

—Lizabeth Cohen, Harvard University

ANDREW WIESE is professor of history at San Diego State University.
